

Rohit Vasant Patil

Full Stack Engineer (AI-Native) · Python · TypeScript · React · Django

+91 7498682506 | p.rohit.2310@gmail.com | [linkedin.com/in/prohit23](https://www.linkedin.com/in/prohit23) | rohitpatil.tech | github.com/rohit-p-droid

SUMMARY

AI-native full-stack engineer with 2+ years of experience shipping production software across Python (Django/DRF, FastAPI), TypeScript (NextJS, Node.js, Next.js/React) and SQL/NoSQL stores. Built and deployed LLM-powered products end to end: RAG, multi-agent workflows, voice AI and MCP integrations, on top of Docker/Kubernetes CI/CD pipelines. Comfortable owning a feature from data model and REST API to UI and deployment.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML/CSS, Java

Frontend: React, Next.js, Tailwind CSS, HTML/CSS, component-based architecture, Hooks/Context, REST API integration

Backend: Django, Django REST Framework, Django ORM, FastAPI, NestJS, Node.js, REST APIs, gRPC, Microservices

AI / GenAI: LLMs, RAG, Agentic AI, Multi-Agent Systems, LangGraph, LangChain, OpenAI (GPT Live, Agents SDK), MCP, Prompt Engineering, Embeddings, Hybrid Retrieval, Qdrant, Graph RAG

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis, Qdrant, Neo4j

Cloud & DevOps: Docker, Kubernetes, Jenkins, GitHub Actions, Vercel, CI/CD, zero-downtime deployments

Engineering: System Design, SOLID principles, Event-Driven Architecture, Message Queues, Distributed Systems

EXPERIENCE

Software Engineer – AI & Full Stack | Netwin Infosolutions, Nashik

Aug 2024 – Present

- AI product:** Built and deployed a production RAG solution (Python, LangGraph, LangChain, Qdrant, LLMs) that automated client documentation workflows and cut manual documentation effort by **60%**.
- Multi-agent systems:** Designed LangGraph/LangChain agents that retrieve information, reason over context and execute workflow tasks for documentation and operations.
- Voice AI & MCP:** Integrated GPT Live into the Q&A agent with session management and delegation; built a Jira MCP server so LLM agents can retrieve, query and triage tickets.
- Retrieval quality:** Designed hybrid retrieval (Qdrant embeddings + keyword search) with contextual query refinement over enterprise documentation.
- AI Scrum Master:** Built an AI scrum-master agent that sends scheduled messages via cron jobs and supports both real-time chat and email-based chat (email conversations processed through cron jobs).
- E-commerce automation:** Built cron-driven bulk product onboarding for an e-commerce project, creating products from uploaded Excel sheets and images along with related catalog data.
- Backend & APIs:** Built REST APIs and enterprise integrations with Django, DRF, NestJS and Node.js; connected Python AI microservices to NestJS services over gRPC.
- Data & architecture:** Engineered a zero-downtime migration from a single-tenant database to a multi-tenant NestJS/MongoDB architecture without a full rewrite.
- Cloud & DevOps:** Owned the Jenkins → Docker → Kubernetes CI/CD pipeline, cutting deployment time by **40%** and enabling zero-downtime releases.

Software Engineer Intern – Backend | Netwin Infosolutions, Nashik

Feb 2024 – Jul 2024

- Built a production Django REST Framework service-ticketing system with role-based workflows for a live mobile application.
- Two-way sync:** Built cron-job-based two-way sync between the ticketing system and the legacy SDP service: tickets created on either platform appeared on the other, and updates and other ticket actions stayed consistent on both.
- Developed an automated technician assignment engine using availability and workload scoring, reducing unassigned-ticket SLA breaches by **40%**.
- Automated time-based billing calculations, removing manual effort and reducing billing errors.

EDUCATION

B.Tech in Computer Engineering (CGPA 7.65/10)

R. C. Patel Institute of Technology, Shirpur

2021 – 2024

PROJECTS

Quick Tech Tools (quicktechtools.dev) | github.com/rohit-p-droid/rp-dev-tool

Next.js · React · TypeScript · Tailwind · Vercel

- Built a multi-tool web app (PDF tools, video processor, image compressor, JSON formatter, QR and color-palette generators) as modular React components organised with custom hooks and Context.
- Performance:** Lazy-loaded heavy modules (FFmpeg.wasm, pdf-lib) with dynamic imports and webpack chunk splitting, added bundle analysis and Lighthouse scripts, and deployed on Vercel.

Mind Graph (Demo Video) | github.com/rohit-p-droid/mind-graph

Next.js 14 · TypeScript · Neo4j · Gemini · LangChain

- Built a Graph RAG app: PDFs are ingested, LLM-extracted triplets are stored in a Neo4j knowledge graph, and natural-language queries use vector search plus 2-hop graph traversal. Next.js API routes and chat UI, deployed on Vercel.

Agent Studio | github.com/rohit-p-droid/agent-studio

Next.js · React · Django · SQLite · RAG

- Built a multi-provider (OpenAI, Gemini, Groq, Claude) AI agent platform with Next.js and Django: configurable agents, real-time chat, RAG document Q&A, persisted via Django ORM.
